COURSE REGULATIONS
(Art. 12 – M.D. no. 270, 22 October 2004)

SECOND CYCLE INTER-UNIVERSITY DEGREE
IN
CIVIL ENGINEERING FOR MITIGATION OF RISK FROM
NATURAL HAZARDS
Class LM-23
(Second Cycle Degree in Civil Engineering)

2018/19 ACADEMIC YEAR
PART ONE – GENERAL PROVISIONS

ART. 1 - NAME, CLASS, DEPARTMENT AND DURATION
ART. 2 - REGULATORY TEXTS
ART. 3 - BODY RESPONSIBLE FOR DIDACTIC AND ORGANIZATIONAL COORDINATION
ART. 4 - ADMINISTRATIVE SERVICES

PART TWO – ORGANIZATION OF DIDACTIC ACTIVITIES

ART. 5 - ANNUAL INDIVIDUAL STUDY PLAN CARD
ART. 6 - ADMISSION REQUIREMENTS
ART. 7 - DIDACTIC ORGANIZATION
ART. 8 - STUDY PLANS
ART. 9 - JOINT-DEGREE PROGRAMMES
ART. 10 - ATTENDANCE AND CURRICULAR PREREQUISITES
ART. 11 - STUDENT ELECTIVE ACTIVITIES
ART. 12 - INTERNSHIPS AND PLACEMENTS
ART. 13 - EXAMINATIONS AND END-OF-COURSE ASSESSMENTS
ART. 14 - FINAL EXAMINATION AND AWARDING OF DEGREE

PART THREE – PROVISIONS REGARDING STUDENTS' COURSE OF STUDY

ART. 15 - CRITERIA FOR RECOGNITION OF DULY-CERTIFIED, EXTRA-UNIVERSITY KNOWLEDGE AND SKILLS
ART. 16 - CRITERIA FOR RECOGNITION OF CREDITS PREVIOUSLY EARNED
ART. 17 - CRITERIA FOR RECOGNITION OF EDUCATIONAL ACTIVITIES UNDERTAKEN AT FOREIGN UNIVERSITIES
ART. 18 - ADMISSION TO SUBSEQUENT YEARS OF COURSE
ART. 19 - CERTIFICATIONS

Appendix n. 1 – Study plan
Appendix n. 2 – List of curricular prerequisites
PART ONE – GENERAL PROVISIONS

Art. 1 – Name, class, department and duration
1. The second cycle inter-university degree course in Civil Engineering for Mitigation of Risk from Natural Hazards, set up by the Department of Civil Engineering and Architecture, is conducted in collaboration with the University of Pavia and the University Institute for Advanced Studies IUSS Pavia, and coordinated by the Faculty of Engineering of the University of Pavia. It belongs to class LM-23 of second cycle degree courses in Civil Engineering, in accordance with the Ministerial Decree of 16 March 2007.
2. The duration of the second cycle degree course is two years.

Art. 2 – Regulatory texts
1. In accordance with the freedom of teaching and the rights/obligations of teaching staff and students, the didactic organization and the carrying out of training activity envisaged for the second cycle inter-university degree course in Civil Engineering for Mitigation of Risk from Natural Hazards are governed by the present regulations, in compliance with the Agreement stipulated between the University of Pavia and the IUSS for the establishment, activation, organization, and shared management of the Study Course, with the Statute of the University of Pavia, with the General Regulations of the University of Pavia, with the University Course Regulations, with the Student Regulations of the University of Pavia, by the Regulations of the Department of Civil Engineering and Architecture, and by the Regulations of the Faculty of Engineering.
2. The regulations referred to in the preceding paragraph are published on the University website at the following addresses:
   - http://dicar.unipv.eu/site/home/dettaglio-home/documento730002779.html
3. For all matters not expressly provided for in these Regulations, the existing provisions of the law apply.

Art. 3 – Body responsible for didactic and organizational coordination
1. In compliance with the competences and criteria set out in Art. 2, the body responsible for the second cycle degree is the Department of Civil Engineering and Architecture which, pursuant to Art. 25 and 26 of the Statute of the University of Pavia, has delegated the functions of didactic coordination to the Faculty of Engineering. The body responsible for the didactic and organizational coordination of the second cycle degree, in compliance with the competences and directions of the aforementioned Department and Faculty, with particular reference to the aspects indicated in Art. 4 of the Regulations for the Composition and Functioning of Boards of Teaching, is the Board of Teaching of Civil Engineering for Mitigation of Risk of Natural Hazards, hereinafter referred to as the Board of Teaching.
2. The Faculty President, the Director of the Department, the Director of the Board of Teaching, the spokesperson for the course, members of the Presidium of Quality, and members of the Review Group, are listed on the website of the Faculty of Engineering (http://webing.unipv.eu/governance/)
Art. 4 – Administrative services

1. The following administrative support services are available to students:
   - the Student Administration Office that deals with the administrative management of students’ academic programmes from the moment they enter the University until their graduation (registrations, transfers, fees, title recognition, student mobility, etc.). The Student Administration Office is located in Via Ferrata 1, Pavia. The website can be found at:
   - The Orientation Centre (C.OR.), which runs activities and projects to help students in the choice of their university courses, to support their academic programmes, and to facilitate their entry into the workplace. To this end, it organizes collective and individual activities, counselling services, orientation meetings. The C.OR. website can be consulted at:
     http://cor.unipv.it
   - The administration office of the Faculty Presidency:
     http://www-3.unipv.it/ingegneria/organizzazione/sedi.php
   - The office of the Department of Civil Engineering and Architecture:
     http://dicar.unipv.eu/site/home.html
   - The offices of the IUSS “Scienze Tecnologie e Società”: http://www.iusspavia.it/.

PART TWO – ORGANIZATION OF DIDACTIC ACTIVITIES

Art. 5 – Annual individual study plan card

1. The Annual Degree Programme Report (SUA) for the degree course, extracted from the ministerial database, can be consulted at the following address:

Art. 6 – Admission requirements

A) Prerequisites

1. The prerequisites for admission to second cycle degree course in Civil Engineering for Mitigation of Risk of Natural Hazards, as specified in the following paragraphs, related to the following three aspects:
   (a) academic qualifications already held;
   b) relevant educational skills acquired through previous academic studies (curricular requirements);
   c) personal preparation, including knowledge of English.
2. The Board of Teaching for the Civil Engineering for Mitigation of Risk of Natural Hazards course designates a special Commission that is responsible for verifying the eligibility of candidates for enrolment in the course as regards compliance with curricular requirements and personal training in the event that such prerequisites cannot be automatically verified; this is illustrated in subsequent paragraphs.
3. Students applying for passage or transfer to the second cycle degree course in Civil Engineering for Mitigation of Risk from Natural Hazards from other second cycle degree programs or from other universities are subject, as far as admission requirements are concerned, to the same rules as those applying to enrolling students.
B) Academic qualifications

4. In order to be admitted to the second cycle degree course in Civil Engineering for Mitigation of Risk from Natural Hazards, applicants must be in possession of a three-year first cycle degree (ex MD 509/99 or ex MD 270/04), a three-year university diploma, a five-year degree (obtained under the previously existing university system, MD 509/99), or other qualifications obtained abroad that are recognized as being eligible under current legislation.

C) Relevant educational skills acquired through previous academic studies

5. Throughout their previous studies (first or second cycle degree courses, or enrolment in single subjects offered at university), students must have acquired a minimum of 96 credits (CFUs) in basic and specific educational activities, with reference to the scientific disciplines specified in the table below. The fulfilment of these requirements can be self-certified.

<table>

6. For graduates of foreign universities, graduates holding a five-year degree (obtained under the previously existing university system, MD 509/99) or anyone who submits, for the purpose of having their curricular requirements recognised, educational activities that are not clearly identifiable through the academic discipline and/or the number of credits, the aforementioned Commission (see the Prerequisites section above) shall assess compliance of their previous academic studies with the required curriculum requirements.

7. In order to allow access to graduates with a high level of preparation and/or motivation, who come from educational courses not fully consistent with the required curriculum requirements, the Commission referred to in the above Prerequisites section, taking into account the skills demonstrated by candidates in their previous academic studies (as evidenced by the documentation attached to the application for university enrolment) and having evaluated, possibly by means of an interview, the candidates’ motivation, may decide, by way of derogation, that the curriculum requirements presented are sufficient for admission to the second cycle degree course, subject to verifications on the adequacy of personal preparation as per the section Adequacy of personal preparation. In such cases, the Commission shall prepare a report outlining any shortcomings noted and indicating any constraints with which students will need to comply in the formulation of their study plans, including any lessons not listed in the standard study plans (see Appendix 1), for as many as 12 credits, respecting, however, the current university system and the total number of credits necessary for conferment of the degree (120 credits). Nevertheless, should differences in the required curriculum requirements be considered incompatible with the educational program of the second cycle degree course, the Commission shall specify the examinations for single subjects that candidates must pass before being able to enrol in the second cycle degree course.

8. Those candidates for enrolment in the cases referred to in paragraphs 6 and 7 above must ask the Board of Teaching, which can in turn consult with the aforementioned Commission
if necessary, to assess the relevant educational skills acquired through previous academic studies so that they might be admitted to the second cycle degree course. The request may be submitted at any time, even by non-graduate students who have an approved three-year study plan at the time the request for assessment is made. The assessment of curricular requirements also takes into account the examinations not yet undertaken but included in the last-approved study plan. Any subsequent amendment to the study plan will require further evaluation.

**D) Adequacy of personal preparation**

9. The personal preparation required for admission to the second cycle degree course and referred to in the previous section *Prerequisites* is considered adequate if the candidate possesses:
   a) a knowledge of the English language at least equivalent to level B2 of the CEF (Common European Framework).
   b) a solid knowledge of basic engineering subjects, and good theoretical and practical training in specific engineering subjects.

10. Knowledge of English at B2 level can be demonstrated at the time of enrolment through the submission of an appropriate certification from those listed in Art. 19 below, or with documentation certifying an even higher level of English. Students possessing citizenship in countries where English is one of the official languages and/or who have been awarded a degree from an institution where the teaching is taught in English are not required to provide a certificate; the interested parties must, however, submit appropriate documentation.

11. A solid knowledge of basic engineering subjects, and good theoretical and practical training in specific engineering subjects is verified by the Commission through evaluation of the following documentation:
   a) *Academic curriculum*, including the list of examinations undertaken, with relative marks, throughout the course of the study that led to the qualification required for admission.
   b) *Curriculum vitae* (C.V.) containing all necessary information regarding the candidate (education, knowledge of languages and computer software, any work experience, other general information useful for sketching the candidate's personality). The candidate can freely choose the format to be used for C.V.

Students who have not yet obtained a degree may also ask for their personal preparation to be assessed, as long as they have already acquired at least 5/6 of the credits envisaged in their study plan (150 credits for Italian courses). Evaluation of the documentation outlined in the previous paragraph may be supplemented, at the discretion of the Commission, by an interview conducted in English, through which the candidate's actual knowledge of the language is verified. The interview, upon written request from the candidate, can also take place telematically.

12. Preparation is considered adequate, thus exonerating candidates from the assessment referred to in the preceding paragraph, if the final marks for their degrees are greater than or equal to 105/110, or if the average of the marks (taking into account all subjects with a mark that are awarded credits) is greater than or equal to 27/30. For a student who is not yet a graduate and therefore conditionally enrolled (see the following section under "Registration Status"), preparation is automatically considered adequate and does not require a specific evaluation if, at the time of conditional enrolment, the average of the marks hitherto
obtained (based on at least 150 credits and evaluated on the credits) is greater than or equal to 27/30.

13. In the case of a degree awarded by a foreign university, verification of the adequacy of the mark is carried out on a case by case basis through an inquiry conducted by the Commission referred to in the aforementioned "Prerequisites" section on the basis of the appropriate equivalence between the mark obtained abroad and that ascribable to Italian degrees. The request for such verification may be submitted to the Board of Teaching at any time.

E) Conditional enrolment

14. Students who are in possession of the necessary curricular requirements and who have adequate personal preparation as specified in the aforementioned "Adequacy of personal preparation" section but who have not graduated within the normal deadline set for enrolment in the course will be eligible for conditional enrolment provided that it is requested before the deadline set out in the official notice.

15. Conditional enrolment, notwithstanding the previsions set forth in the Student Regulations of the University of Pavia, gives students the right to attend lessons in the first semester but not to undertake examinations until they have fully registered after the conferment of their degree, in any case no later than 31 October. If students have still not graduated by October 31, they forfeit to all intents and purposes their enrolment for the second cycle degree course and are automatically refunded the amount paid in enrolment fees, excluding stamp duty.

16. Even students who have not enrolled conditionally can do so by 31 October provided they have met all the prerequisites and that they pay interest on arrears.

Art. 7 – Didactic organization

1. The educational activities of the second cycle degree course lead to the acquisition, on the part of students, of university credits (CFUs) in accordance with current legislation.

2. The average total learning commitment sustained in one year by a full-time student is conventionally set at 60 credits.

3. Each credit granted in the course corresponds to an average total of 25 hours workload per student, of which at least 50% is set aside for personal study or other activities involving individual learning, except for highly experimental or practical educational activities. Didactic activity takes different formats: lectures, exercises and practical activities. For each subject, the distribution of hours of didactics among these three formats is determined by the teacher on the basis of the credits attributed to the subject itself, taking as a reference point the following average values:
   - 1 credit = 7.5 hours of lectures;
   - 1 credit = 12.5 hours of exercises;
   - 1 credit = 22.5 hours of practical activity.

4. All those didactic activities that involve a direct approach with physical aspects of the subject matter (laboratory or field activities, guided tours of facilities or companies, project drawings etc.) and which necessitate on the part of the student a modest reworking of the activity once it has been carried out, are considered ‘practical’.

5. The credits pertaining to each training activity shall be acquired by students after they pass a final examination or following other forms of assessment as to their preparation and the acquisition of skills.

6. Regardless of the duration of students’ academic studies, acquired credits are not considered obsolete except for cases of termination or the waiver of studies for which, in the event of re-enrolment, the validation of previously-acquired credits is subordinated, inter alia, to an assessment of their possible obsolescence by the Board of Teaching (see Art. 16 below).
particularly well-motivated cases, the obsolescence of credits related to specific educational activities may be deliberated by the Board of Teaching once the opinion of the Executive Committee of the Faculty has been heard. A resolution of obsolescence provides details on how obsolete credits may be regained, establishing any additional assessments that the student may have to sustain in this regard.

7. The didactic organization of the courses is biannual and the academic year is divided into the following teaching periods:
   a) 1st semester: from the end of September/beginning of October to mid-February
   b) 2nd semester: from the beginning of March to the middle of July

Subjects are organized in the form of biannual lessons (the study plan usually envisages that students follow a subject for one semester), alongside other courses that are conducted serially throughout the semester.

8. By the end of May each year, the Executive Committee of the Faculty decides on the dates for the commencement and termination of the periods mentioned in the previous paragraph (calendar of teaching activity) for the following academic year; the approved calendar is published on the Faculty website.

9. For the final examination of the degree course (second cycle degree examination), 6 sessions per year are planned, to be held in the months of February, April, July, September, October and December. The Executive Committee of the Faculty decides on the dates for the second cycle degree examinations by December each year; the approved calendar is published on the Faculty website.

10. Every year, before the deadline set for the compilation of the Annual Individual Study Plan Card (see Art. 5), the lesson timetable for the following academic year is published, complete with indications regarding the classrooms where lessons will be held, as well as a detailed calendar of the exams for all sessions.

Art. 8 – Study plans

1. All students are required to submit their study plan within the terms indicated annually by the University.

2. Study plans compiled in accordance with the models set out in Appendix 1 of the present Regulations and with the choices therein suggested (standard study plans) are automatically approved.

3. Students have the right to submit a different study plan (individual study plan), which must nevertheless meet the requirements set out in the Annual Individual Study Plan Card referred to in Art. 5. Individual study plans must be approved by the Board of Teaching who can delegate their evaluation and approval to specifically designated Commissions or individual members of the teaching staff.

4. The inclusion in the study plan of educational activities chosen personally by the student, and referred to in Art. 10, paragraph 5, letter a) of the M.D. 270/04, is governed by the Article 11 below.

5. Students who choose to enrol as part-time students, as provided for by Art. 53 of the University Course Regulations and pursuant to Art. 13 of the Student Regulations and the Regulations for the Enrolment of Part-time Students, must submit a study plan to the Board of Teaching that is coherent with the duration chosen for the degree course.

Art. 9 – Joint-degree programmes

No joint-degree programs are currently envisaged for the second cycle degree in Civil Engineering for Mitigation of Risk from Natural Hazards.

Art. 10 – Attendance and curricular prerequisites

1. Attendance at all didactic activities is mandatory.
2. The Board of Teaching may establish pre-requisites for subjects as it sees fit. The existence of a pre-requisite is indicated on the page of the relevant subject published on the faculty website.
3. A subject cannot be propaedeutic to another if both subjects are conducted in the same year of the course.
4. In the case of one subject being propaedeutic to another, students cannot sit the exam of the latter until the exam of the former has been passed.
5. Any propaedeutic activities imposed the Board of Teaching are set out in Appendix 2.

Art. 11 – Student elective activities

1. For those educational activities independently chosen by students and referred to in Art. 10, paragraph 5, letter a) of the M.D. 270/04 (Type D TAF), the Board of Teaching proposes a list of recommended courses and activities, while allowing students the right to choose any subject, provided that it is consistent with the educational project, from amongst those offered and accredited by the University of Pavia or the IUSS.
2. A study plan that envisions subjects other than those recommended must be approved by the Board of Teaching that may appoint a Committee or an individual teacher to the check and eventually the approval of this study plan. Subjects that are not consistent with the educational project or whose content exceeds 20% of repetition of the contents of other subjects that are part of the student’s study plan or his/her previous academic studies shall not be approved.
3. Students cannot choose subjects previously studied at university, unless they have obtained specific validation for these subjects outside of the 180 credits needed to complete the first cycle degree course. The relevant offices verify the correct application of this rule on the part of students by checking their academic record prior to enrolment in the second cycle degree course. In case of violation of the above rule, students are not permitted to undertake the second cycle degree examination and must change their study plans.
4. The activities chosen independently by students and referred to in paragraph 1 must not include subjects in the medical field for which there are enrolment restrictions on a national level.
5. Students cannot add more than a total of 24 credits per year to cover extra learning activities.

Art. 12 – Internships and placements

There are no curricular internships and placements for the second cycle degree in Civil Engineering for Mitigation of Risk from Natural Hazards. However, for the preparation of the thesis, it is envisaged that internships can be activated with Italian or foreign research companies or organizations by means of specific agreements.

Art. 13 – Examinations and end-of-course assessments

A) General rules

1. Given the particular organization of the second cycle degree course programme
   - which, in order to allow teaching by foreign teachers, envisages intensive series of courses so that no less than 80% of the student’s workload is devoted to a single subject during the periods dedicated to lessons;
   - that requires the learning and assessment of subjects to be ongoing, with individual/group projects/papers carried out by students throughout the course, supported by sessions of workshops/practical classes conducted by the lecturer and by tutors, and by the implementation of mid-course tests;
examinations and assessments are governed by the present Art. 13, by way of partial derogation from the University Course Regulations.

2. All activities that lead to the acquisition of credits conclude with a form of assessment. This is expressed by commissions including the persons in charge of the activity, and is constituted according to the rules contained in the University Course Regulations.

3. In the second cycle degree course, no more than 12 final exams or assessments can be planned. This number includes specific, related/supplementary and elective activities. Final examinations (or assessments) pertaining to elective activities are calculated as corresponding to a single unit, even when they give rise to multiple examinations or multiple assessments. The set of educational activities referred to in points c), d), e) of paragraph 5 of Art. 10 of M.D. 270/2004 are not included when calculating the number of final examinations or assessments; tests for these activities should in any case not exceed 5 in number, including the final test for conferment of the degree.

4. In the case of subject courses structured in multiple integrated and co-ordinated modules, each entrusted to a different lecturer, the final overall assessment is decided on collectively by all the lecturers. Evaluation may be carried out in separate phases, including that for separate parts of the programme, and may also be conducted at different times provided that the overall final decision that results in the passing of the examination is made collectively.

5. Examination dates are set during the semester, and the exams take place at the end of each subject course.

6. For all subjects, regardless of the semester in which didactic activity has taken place, students are given an extra opportunity to sit examinations in September.

7. The minimum number of examinations and the organization of any additional exams shall be governed by the following "Assessment modality" section, subject to the provisions of the University Course Regulations.

8. The examinations in the different sessions are distributed according to a calendar coordinated by the Board of Teaching with the support of the office of the Faculty President.

9. The calendar of examination dates, including all exam sessions and all the subjects held throughout the current academic year, is published on the Faculty website following the terms set out in Art. 7.

10. Once the calendar of examinations has been published, changes are not permitted except for cases of absolute necessity, which need to be documented by a written submission addressed to the Faculty President. In any event, an examination cannot be deleted and only in exceptional circumstances can be brought forward.

**B) Assessment modality**

11. Assessment modalities are defined by the lecturer responsible for the educational activity, in accordance with the indications given in the following paragraphs, as well as with any actions of co-ordination promoted by the Faculty and/or the Board of Teaching.

12. Modalities of assessment may involve:
   a. assessment based on individual work/papers completed by the student throughout the course, supported by sessions of workshops/practical classes conducted by the lecturer and by tutors, assisted by workshop sessions/tutorials assisted by the teacher and by tutors/assistants,
   b. written and/or oral mid-course tests
   c. final written and/or oral test.
   The relative weight of modalities a, b and c is stated by the lecturer prior to the beginning of the course.

13. At the beginning of the academic year, the modality of assessment for every educational activity is published by the lecturer in charge of the course on the webpage pertaining to the
university subject catalogue (Syllabus: [http://www.unipv.eu/site/home/didattica/catalogo-insegnamenti.html](http://www.unipv.eu/site/home/didattica/catalogo-insegnamenti.html)).

Such information must specify:

- type of test (written, oral, written + oral, individual papers);
- in the case of testing carried out in stages (e.g., written + oral), any thresholds that need to be exceeded at one stage to gain access to the next, the knowledge necessary to overcome these thresholds, as well as the relative weight attributed to the results of the various stages in deciding the final vote.

14. Examinations entail an evaluation which must be expressed in a mark out of 30. Credits are acquired if the evaluation is equal to or greater than 18/30. In the case of a maximum evaluation of 30/30, the Commission may unanimously grant ‘cum laude’. Should a mark be insufficient, failure is expressed by means of the mark but does not appear on the student’s academic record.

15. For some educational activities, such as internships or others included in the didactic programming and indicated in the Syllabus referred to in paragraph 10 above, evaluation may be expressed with two levels: "approved" or "not approved", or "satisfactory" or "unsatisfactory".

16. At least one examination at the end of the course is required for all subjects, as is an extra opportunity to sit examinations in September.

17. For student athletes of disciplines recognized by the Italian National Olympic Committee or the Italian Paralympic Committee, specific examinations can be organised to replace those on the calendar, at the request of the interested parties, if the scheduled examinations coincide with important sports events that are of at least national importance. Commitments that preclude participation at a scheduled examination must be documented to the Faculty President who will, in agreement with the lecturer, organize for the student to take the examination on a different date.

18. Students who have not passed an examination should sit it again at a later date. Lecturers may not prescribe regulations that restrict the possibility of a student to enrol in subsequent scheduled examinations.

19. Students who renounce a mark after having passed an examination must sit the exam again at a later date. The refusal must be stated in the manner and time decided by the lecturer. Once a mark has been accepted and registered, the relevant examination cannot be retaken.

20. In the case of written tests, students can view their own corrected papers in accordance with the modality set out by the lecturer.

Art. 14 – Final examination and awarding of degree

1. The second cycle degree in Civil Engineering for Mitigation of Risk from Natural Hazards is conferred following the final exam, which verifies the achievement of the educational objectives that qualify the second cycle degree course.

2. The final exam, for which 27 credits are awarded, consists of the defence, in front of a special second cycle degree Commission, of an original thesis that has been prepared under the guidance of a lecturer acting as a Supervisor. The defence aims to evaluate the quality of work, the general preparation of the candidate, knowledge of the subject and the ability to present and discuss a technical, professional and/or scientific topic with rigor, clarity and language skills.

3. The thesis consists of a theoretical, experimental or project-based work of a duration that is proportionate to the number of credits awarded on the basis of the study plan (27 credits involve a total workload of 675 hours); it should be characterised by completeness, make a critical and/or creative contribution, and require independent and documented preparation on the part of the candidate. The thesis must develop topics specifically relevant to the
educational objectives of the course, and represent an advanced and original stage of research or a project that is significant on account of its complexity, in one of the Civil Engineering sectors. The thesis can be developed while serving an internship at a company or institution in Italy or abroad, after the stipulation of a special agreement.

4. The thesis is prepared under the guidance of a Supervisor, who can be a tenured or contract professor, a researcher from the University of Pavia or the IUSS, or a lecturer from the Faculty. The position of Supervisor is not necessarily tied to the disciplinary field of the person who holds it; the topic of the thesis, however, should fall within his/her competences and scientific interests. The Supervisor:

- provides graduands with assistance as part of his or her own institutional responsibilities, guiding them and stimulating them in choosing and defining the contents of their work;
- commits to helping graduands complete their university studies within a reasonable timescale;
- monitors the coherence of the thesis in order to obtain logical and organic results, and to verify the congruity of the drawing up of the report and the final drafts;
- introduces graduands to the Commission of the second cycle degree, describing the duration and intensity of the commitment shown and integrating where necessary, and with the consent of the President of the Commission, the presentation of the thesis.

5. The graduand chooses his/her Supervisor from among the persons indicated in paragraph 4 above, requesting assignment of the thesis a reasonable time in advance of the estimated date of the final exam. The thesis is then prepared to the best of the graduand’s ability in accordance with his/her strategies, as discussed and agreed upon with the supervisor.

6. Upon conclusion of the graduand’s work, the Supervisor attests, by means of the form provided by the Student Administration Office, that the activity actually carried out in preparing the thesis corresponds to the number of credits attributed to the final exam on the basis of the study plan. If the Supervisor is not a member of the graduation Commission, at least five days prior to the final exam he/she must send a short report on the activity of the candidate to the president of the Commission, outlining the duration and intensity of the commitment demonstrated.

7. The graduation Commission is appointed by the Faculty President on the proposal of the president of the Board of Teaching or of the Contact Person for the course, and it consists of at least seven members, at least four of whom must be tenured professors or researchers, responsible for modules and/or subjects taught at the Faculty or in the departments of Civil Engineering and Architecture, Environmental and Earth Sciences, or the field of Uncertainty and Risk Assessment at the IUSS. Any assistant supervisors who are not part of the Commission may participate in its activity without the right to vote. As a rule, a Commission is appointed for each examination. Should circumstances so require, more commissions may be appointed. Among the actual members of the Commission, there should preferably the supervisors of the second cycle degree theses submitted to the Commission.

8. The Commission is chaired by the oldest tenured professor amongst those of the highest level. The chairman designates the secretary responsible for taking the minutes from among the members of the commission.

9. There are normally six second cycle degrees examinations per year, according to a calendar approved annually by the Executive Committee of the Faculty, as stated in the aforementioned Article 7, paragraph 9.

10. The president of the Board of Teaching, or the Contact Person for the course if delegated by the former, when proposing the formulation of the Commission to the Faculty President, either chooses an external examiner for each candidate from among the members of the Commission or delegates the choice to the president of the Commission. The external
The examiner’s task is that of examining the thesis prepared by the candidate so that he/she can express a reasoned opinion as to its readability and organization.

11. The graduation score, expressed as a mark out of 110, is the sum of a base score and an increment. The base score takes into account the marks for the examinations sustained by the candidate, excluding those relating to supernumerary activities, and is calculated in accordance with paragraph 12 below. The increment is awarded by the Commission during the examination, in accordance with the procedures described in the paragraph 13 below.

12. The base score is obtained from the weighted average of the marks for assessments in didactic activities that involve a final mark, taking as a weight the number of credits associated with the individual didactic activity. The weighted average is then converted to a mark out of 110.

13. The increment, up to a maximum of 6 points, is collectively awarded by the Commission at the end of the examination as a sum of the following three items:
   - 0 to 2 points are granted by the Commission for the quality of the presentation of the candidate’s work at the examination;
   - 0 to 2 points are granted by the Commission for the quality and completeness of the draft submitted, after having heard the opinion of the external examiner.
   - 0 to 2 points are granted by the Commission, taking into account the Supervisor’s opinion of the presentation.

The above three scores, not necessarily whole numbers, are the arithmetic mean of the points assigned by each member of the Commission.

14. The final mark (sum of the base score and the three increment items) is rounded to the nearest whole number. ‘Cum Laude’ can be awarded only when the sum of the base score and the increment already decided by the Commission is equal to at least 112/110. The awarding of the designation ‘Cum Laude’ requires the unanimity of the Commission.

15. The Faculty reserves the right to adopt "anti-plagiarism" software, which can reveal material that has been copied, without the use of quotation marks and without reference to the original source, from documents written by others. The discovery of a particular case of plagiarism that is regarded as serious by a commission formed by the Faculty President, the president of the Board of Teaching and the Supervisor, determines the impossibility of the candidate to appear at the final examination, and the activation of a disciplinary measure against the student. If the verification is carried out ex-post, all necessary action will be taken to correct the situation.

16. The second cycle degree thesis must be written in English. The discussion is conducted in English.

PART THREE – PROVISIONS REGARDING STUDENTS’ COURSE OF STUDY

Art. 15 - Criteria for recognition of duly-certified, extra-university knowledge and skills

1. Under Art. 2 c. 147 of Law 286/2006 and Art. 14 of Law 240/2010, the Board of Teaching may validate, for a total number of credits not exceeding 12, areas of professional knowledge and skills that have been individually certified pursuant to current legislation, as well as other knowledge and skills acquired through educational activities at post-secondary level, the planning of which was supported by a university.

The Board of Teaching can also validate, for a total of no more than 6 credits (which are included within the aforementioned 12 credits), the winning of an Olympic or Paralympic medal or the conferment of a World Champion, European Champion or National Champion title in the disciplines recognized by the Italian National Olympic Committee or the Paralympic Italian Committee (pursuant to Article 14 of Law 240/2010).
2. The validation of credits previously acquired shall be decided by the Board of Teaching, on a case-by-case basis, with reference to an inquiry conducted by one or more lecturers who have been delegated by the Board. The educational activities (TAF) for which credits and their number are to be recognized, even though they may comply with regulations, are established on the basis of criteria regarding the relevance of the discipline, taking into account the contribution of the activity towards reaching the objectives of the course, its specific content and possible obsolescence, as well as the time commitment required. For this purpose, the application for recognition of an activity must be accompanied by official documentation from which the above elements can be deduced; the lecturers delegated to the inquiry by the Board of Teaching may carry out further verification if deemed necessary.

3. If, as a result of the recognition of credits previously acquired, the student's study plan amounts to being an individual study plan, it must be approved by the Board of Teaching, in accordance with Art. 8.

Art. 16 - Criteria for recognition of credits previously earned

1. The Board of Teaching decides on the recognition of previous academic studies for students who have already obtained a degree at the University or at another Italian university, and who have requested, at the time of enrolment, a reduced course of studies. This can be granted after evaluation and validation of those credits that are considered recognizable under the terms of paragraph 5 below.

2. The Board of Teaching decides on the recognition of previous academic studies that were interrupted due to the loss or renunciation of student status on the part of students who have requested, at the time of enrolment, a reduced course of studies. This can be granted, after evaluation and validation of those credits that are considered recognizable under the terms of paragraph 5 below.

3. The Board of Teaching may validate credits previously acquired by the student after enrolment in single subjects at the University of Pavia or at other universities.

4. In the case of transfer from another university or from another University course, recognition of credits is approved by the Board of Teaching in accordance with current legislation, the University Course Regulations and any other resolutions taken by the Executive Committee of the Faculty and/or the Board of Teaching itself.

5. The validation of credits previously acquired shall be decided by the Board of Teaching, on a case-by-case basis, with reference to an inquiry conducted by one or more lecturers who have been delegated by the Board. The educational activities (TAF) for which credits and their number are to be recognized, even though they may comply with regulations, are established on the basis of criteria regarding the relevance of the discipline, taking into account the contribution of the activity towards reaching the objectives of the course, its specific content and possible obsolescence, as well as the time commitment required. For this purpose, the application for recognition of an activity must be accompanied by official documentation from which the above elements can be deduced; the lecturers delegated to the inquiry by the Board of Teaching may carry out further verification if deemed necessary.

6. If, as a result of the recognition of credits previously acquired, the student's study plan amounts to being an individual study plan, it must be approved by the Board of Teaching, in accordance with Art. 8.

Art. 17 - Criteria for recognition of educational activities undertaken at foreign universities

1. Periods of study completed by students of the second cycle degree at foreign universities under international agreements (such as those provided by the Erasmus Programme + or by other conventions stipulated by the University) are recognized as an educational tool equivalent to that offered by the Faculty, requiring the same level of student commitment and having content consistent with that of the course of studies. They are also promoted as a
means of cultural exchange and integration towards the student’s personal and professional training for the purpose of obtaining a degree.

2. The “Learning Agreement” (LA) is a document that defines the project of educational activities that are to be undertaken abroad to substitute some of the those envisaged in the second cycle degree course; the student must complete it, taking care to pursue not so much the same content as the complete coherency of the "curriculum" with the educational objectives of the second cycle degree course.

3. For every student intending to study abroad, the possibility of having the credits acquired at a foreign university recognised is established in advance through the LA, which is signed for approval by the lecturer appointed by the Board of Teaching as a Supervisor for the study activities conducted abroad. It is the responsibility of the Supervisor to ensure the coherence of the LA with the educational objectives of the second cycle degree course.

4. At the end of the study period abroad, the Board of Teaching, at the student's request, on the basis of the LA and in relation to the results achieved and adequately documented by the foreign university (in the case of the Erasmus + Programme by means of the Transcript of Records") recognises the educational activity conducted abroad and any mark obtained.

5. The Board of Teaching approves recognition in terms of direct correspondence between one or more educational activities present in the study plan and one or more educational activities the credits for which have been acquired at the foreign university.

6. Should the activities for which credits have been acquired at the foreign university have contents that are relevant to the educational objectives of the second cycle degree course but no direct correspondence with any of the educational activities present in the study plan, the Board of Teaching, on the proposal of the Supervisor, may authorize, pursuant to art. 50, paragraph 5 of the University Course Regulations, the submission on the part of the student of an individual study plan, in accordance with the declaration of the class and the organisation of the course. For each activity undertaken abroad, it is necessary to indicate any corresponding Italian academic disciplinary sector and the relative number of credits.

7. For each recognised examination pertaining to activities undertaken at the foreign university, the Teaching Board assigns a mark that corresponds to the mark awarded abroad. Where different criteria are used for the awarding of marks, in the case of exchange programs within the European Union the European Credit Transfer System (ECTS) credit system is adopted. On the basis of statistical criteria for the distribution of the marks awarded at the Faculty of Engineering of the University of Pavia, the following correspondences are established:

<table>
<thead>
<tr>
<th>ECTS mark</th>
<th>Recognised mark</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>30/30</td>
</tr>
<tr>
<td>B</td>
<td>28/30</td>
</tr>
<tr>
<td>C</td>
<td>25/30</td>
</tr>
<tr>
<td>D</td>
<td>22/30</td>
</tr>
<tr>
<td>E</td>
<td>18/30</td>
</tr>
<tr>
<td>FX</td>
<td>-</td>
</tr>
<tr>
<td>F</td>
<td>-</td>
</tr>
</tbody>
</table>

8. Study and research activities carried out abroad for the purpose of preparing for the final examination, or internships undertaken under international agreements (eg Erasmus Traineeship) are recognised by the Board of Teaching, provided they are conducted with appropriate modalities and commitment and with documented results.
Art. 18 - Admission to subsequent years of course
1. In order to enrol in the 2nd year of the course, it is necessary that the student, by the end of the September exam session, has acquired at least 36 credits.

Art. 19 - Certifications
1. The following linguistic certifications, corresponding to level B2 of the Common European Framework of Reference for Languages, have been established by the Council of Europe, are considered appropriate, and are automatically approved for the purpose of attesting that students have the level of English required for admission to a degree course:

<table>
<thead>
<tr>
<th>Certifying body</th>
<th>Certification corresponding to level B2 of the Common European Framework of Reference for Languages</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cambridge English Language Assessment (Part of the University of Cambridge)</td>
<td>Cambridge English: First (FCE)</td>
</tr>
<tr>
<td>Cambridge English Language Assessment (Part of the University of Cambridge)</td>
<td>International English Language Testing System (IELTS): minimum band score = 5.5</td>
</tr>
<tr>
<td>Cambridge English Language Assessment (Part of the University of Cambridge)</td>
<td>Business Language Testing Service (BULATS) Reading/Language Knowledge Test: minimum score = 60</td>
</tr>
<tr>
<td>Educational Testing Service (ETS)</td>
<td>Test of English as a Foreign Language Internet Based Test (TOEFL iBT): minimum score = 77</td>
</tr>
<tr>
<td>Educational Testing Service (ETS)</td>
<td>TOEIC Listening and Reading Test: minimum score = 785 + TOEIC Speaking and Writing Test: minimum score = 310</td>
</tr>
<tr>
<td>Trinity College London</td>
<td>Integrated Skills in English (ISE II)</td>
</tr>
<tr>
<td>City &amp; Guilds</td>
<td>Communicator B2</td>
</tr>
<tr>
<td>Pearson</td>
<td>English for Speakers of Other Languages (ESOL) Level 1 B2</td>
</tr>
</tbody>
</table>

2. The suitability of other certifications or different tests held by other universities is assessed on a case-by-case basis by the Faculty President who, in investigating, is assisted by the teacher of the English language and, if necessary, by the expertise of the Language Centre of the University.

Variations on the study plan will not be approved unless they are justified by important reasons. If you wish to make different choices from the one provided, the study plan is individual. (WRITE THE NEW NAME OF EXAM IN THE COLORED BOX AND DRAW A LINE ON THE EXAM YOU WISH TO CHANGE. WRITE THE NUMBER OF CHOICE THE EXAM REFERS TO IN THE COLORED BOX).

It is required to add a revenue stamp of 16€ to the form and the study plan will be submitted to the qualified Teaching Council.

Approved by ……………………………………………………………………………………………………………………………

THIS STUDY PLAN IS WRITTEN IN COMPLIANCE TO THE STUDY COURSE REGULATIONS AND TO THE STUDENT ENROLLMENT CLASS ("SCHEDA RAD")

HEAD OF ……………………………………………………………………………………………………………………………
